

PAVER WASH

SRW PAVER WASH & EFFLORESCENCE CLEANER

SRW (EF) Paver Wash & Efflorescence Cleaner is a mildly acidic product which acts quickly to dissolve efflorescence (white mineral deposits) and ground-in dirt from pavers, retaining walls, brick, and concrete surfaces. Use as a general cleaner or before sealer application to clean paver surface, brighten colors and create a stronger sealer adherence or penetration.

- Dissolves Mineral Deposits and Loosens Ground-in Dirt
- Restores Original Color and Prepares Surface for Sealing
- Contains No Muriatic Acid or Hydrochloric Acid
- Use as a General Cleaner (Environmentally Friendly)

DIRECTIONS

1. Clean surface of any major dirt or debris, especially in the joints. If necessary, use **SRW (CD) Cleaner/Degreaser** for removal of stains and **SRW (RE) Rust Eliminator** for removal of rust, prior to EF application.
2. Wet surface and surrounding area thoroughly (see User Tips). Do not apply in hot direct sunlight or in temps over 80° F.
3. Directly apply **SRW (EF) Paver Wash & Efflorescence Cleaner** to the wet surface with a non-metallic sprayer or sprinkler can. On a slope, start at the top. For large areas, work in sections. Let cleaner activate on surface for approximately 30 seconds (depending on the surface), then, scrub the surface with a bristle brush.
4. Rinse surface and surrounding area immediately and thoroughly with clean water, until all traces of foam disappear. Let dry. Repeat if necessary. When dry, apply **SRW Paver Seal** sealants.

Cleanup • Rinse off all equipment with clean water thoroughly and let dry.
Coverage • 150-200 sq ft per gallon

USER TIPS

- Wait 90 days for new pavement to cure. Efflorescence may re-develop as the block cures, repeat treatment if necessary before sealing.
- Do not allow product to dry on surface, keep wet at all times. Prolonged contact of cleaner to metal or other surfaces may result in surface etching or damage.

PACKAGING

PART NUMBER	SIZE	# PER CARTON OR PALLET	LBS
SSE CTN	1 Gallon	4/ctn; 36 cartons/pallet	34/carton 1269/pallet

WARNINGS

Contains Sulfamic Acid. Avoid contact to skin, eyes, and clothing. For eye contact, flush with water for at least 15 minutes. If irritation persists, see a physician. Wash exposed skin with warm, soapy water. See safety data sheet.
